IQ Panel 4

Everyone Benefits with a Truly All-in-One Panel

Johnson Controls

IQ Panel 4

THE ALL-IN-ONE SMART HOME AUTOMATION

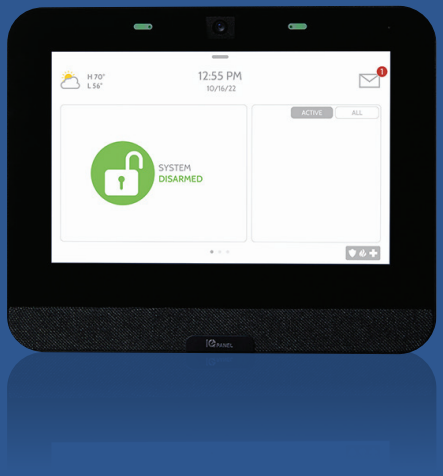

You're in the business of protecting homes and businesses, so there is no room to compromise. Yet these days, customers want more than an alarm. Security must go hand in hand with home control. And, it has to be easy and in tune with their lifestyle.

That's a lot of demands, but now you can deliver with the only panel that has it all: IQ Panel 4. The all-in-one smart home automation and security panel that sets you apart from the competition.

IQ Panel 4 gives your customers more of what they want in terms of design, ease of use, peace of mind, and cost-effectiveness. While you enjoy essentials like easy and quick installation, remote maintenance, future upsell opportunities, and robust operation.

Everyone says they're doing security different or better. But no one else does it like this.

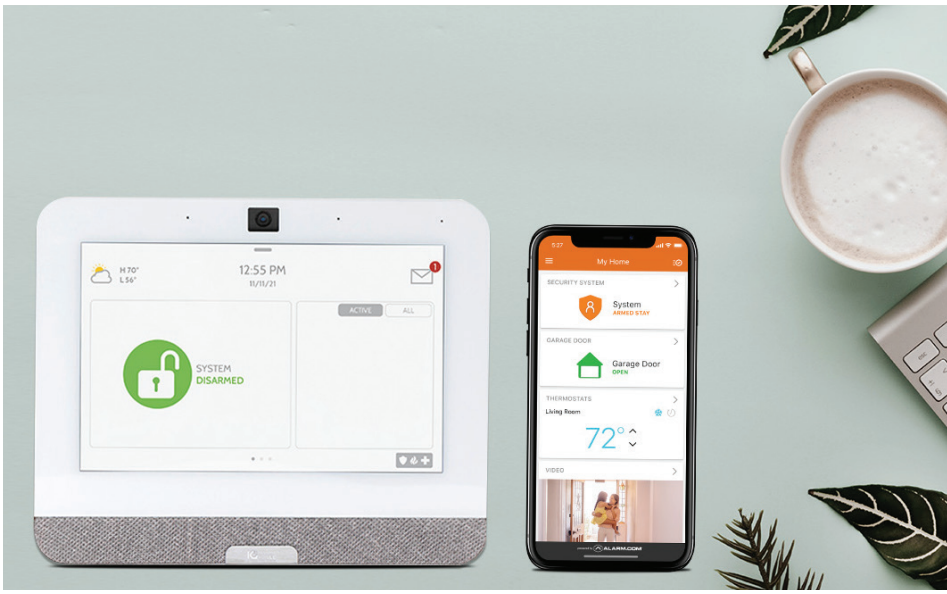

Let's take a look at how more built-in capabilities means more value for your customers and for you.

SLEEK TOUCHSCREEN PANEL WITH A PREMIUM USER EXPERIENCE

With an attractive 7" touchscreen, and simple swipe operation that's familiar to anyone with a smartphone or tablet, IQ Panel 4 totally modernises the way security looks and feels. End-users can control all functions and connected devices, as well as create different automation scenes, for easy control of their homes.

Ultra-thin (less than 2.5 cm), the IQ Panel 4 has the smallest and sleekest form factor of any platform on the market. And it comes in a choice of either white or black.

TIME-SAVING INSTALLATION – GOOD FOR CUSTOMERS, GREAT FOR YOU

IQ Panel 4 is designed for easy, assured and quick installation – so you can do more in a day, and your customers experience minimal disruption to theirs.

With the new smart-mount bracket, IQ Panel 4 ensures fast, no-fuss installations. Just attach the bracket to the wall, snap the panel in place, and you're done. You're in and out of there in no time.

Or, instead of installing the panel on the wall, it can be snapped on the light yet sturdy table-top frame.

Plus, the Easy Install Wizard makes installing the IQ Panel even simpler than ever before, with step-by-step guidance for connecting Wi-Fi, updating the software, pairing sensors, Z-Wave, and more. This ensures proper installation, signal strength, and connectivity while reducing time in the home.

Once installed, the panel's built-in Diagnostics Tools for troubleshooting help reduce maintenance calls, saving you time, and in turn, further reducing total cost of ownership.

8-MEGAPIXEL TILT CAMERA – FOR DETAILED DISARM PHOTOS AND VIDEO

The IQ Panel 4 is equipped with an 8MP camera with a 120° wide angle lens and FlexTilt. This means better coverage, with brilliant colour and clarity, for more detailed disarm photos to see who is disarming the system, and alarm videos, remotely.

Plus, it sees into the room like a security camera, for live image capture of who's around... a burglar or the kids?

LIVE ANSWER

Who's that knocking on the door? With the Live Answer feature, IQ Panel 4 once again delivers a unique end-user experience, giving your customers an instant live view of the things that matter to them. This includes live doorbell views. So when the doorbell is pressed a "push notification" pops up on the panel. They can then answer the call, talk back and forth with whoever's at the door, disarm the system, and unlock the doors, directly from the touchscreen.

LIVE VIEW, ANYTIME

Do your customers want to see what's going on at home? Images from up to 40 cameras can be viewed via the smartphone app or the panel. Additionally, if the camera has audio capability, two-way communication is supported, directly from the panel interface.

HANDS-FREE BLUETOOTH DISARMING – EXCLUSIVE ON IQ PANEL 4!

Customers can use the system more, by dealing with it less. No more counting down the seconds with a mad rush to punch in one's code on the keypad. Instead, customers can disarm the panel, without touching a thing. They don't even need to take their phone out of their pocket! Bluetooth disarming is the quickest, easiest way to enter one's home, hassle free. Up to 5 smartphones can be paired to a single panel. The system then disarms when the first phone comes in range.

This, by the way, is quoted as many customers' favourite feature!

OUTSTANDING AUDIO – AND POSSIBLY EVEN A MUSIC PLAYER

The panel is also equipped with 4 four-watt front-facing speakers. This ensures incredible sound for chimes, voices, and on-screen video tutorials.

Plus, the speakers combine with 3 MEMs microphones with echo cancellation for the best 2-way voice ever experienced. Live Answer video doorbell calls and Live View camera streaming never sounded so clear.

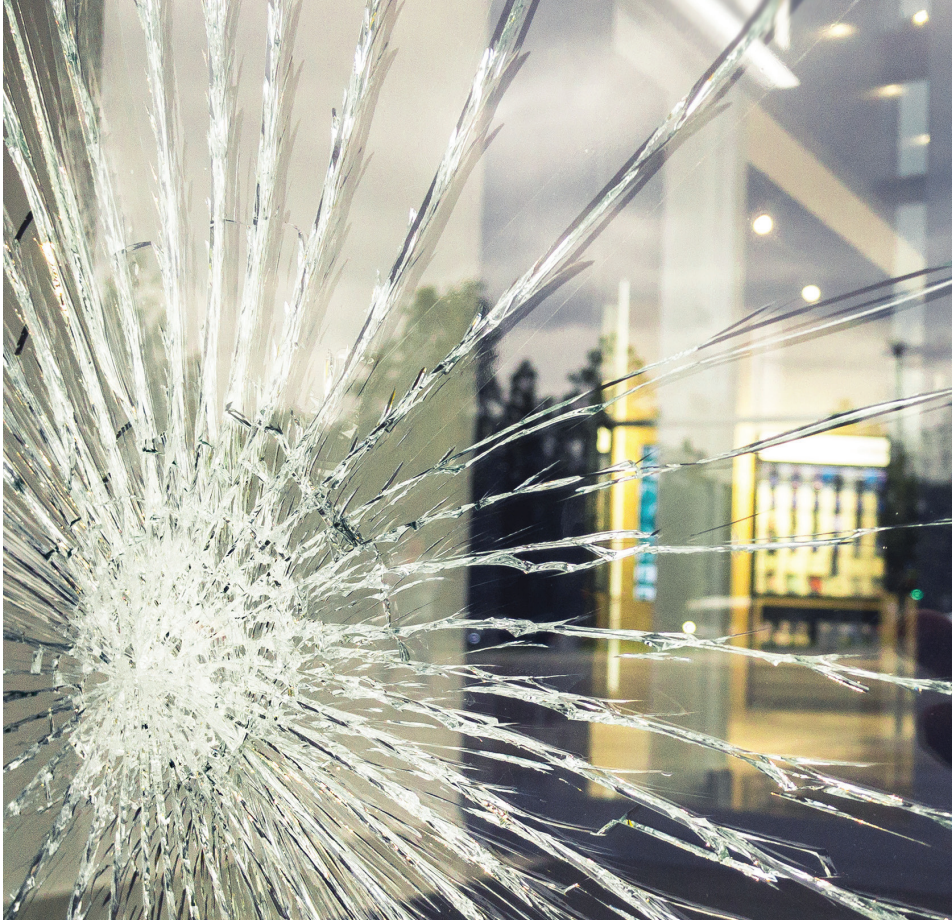

A neat optional feature is the smart-looking IQ Base table stand subwoofer. With Bluetooth music streaming built in, the IQ Base turns IQ Panel 4 into the only security panel that can also function as a music player! Customers can then leave it on the countertop, table, or desk. And with an attractive and sleek design, it actually blends in with any décor.

BUILT-IN GLASS BREAK DETECTOR

Taking a unique approach, the IQ Panel 4 uses its own processing power and flexible software to turn its triple microphones into a built-in glass break detector. That means when the system is armed, the microphones are "listening" for the sound of breaking glass, activating an alarm when needed.

With glass-breaking sensing built-in inside the panel, end-users don't have to buy another glass detector for this room. This saves costs, enhances convenience and reduces impact on the home decor, and.

BUILT-IN MOVEMENT SENSOR

Continuing the all-in-one theme, the IQ Panel 4 also has a built-in movement sensor. That means if it's been disarmed remotely, photos will continue to be taken of any movement in front of the panel. It's another important layer of security, engrained in the panel.

PHOTO FRAME FUNCTIONALITY

Back to good looks for a second. The touchscreen panel can also do double duty as a photo frame. That means customers can upload pictures to fill the screen with art, family photos, or ambience building scenery. Another neat feature that makes this security panel, once again, completely different from the rest.

POWERG WIRELESS TECHNOLOGY

You are at the end of the day selling security. And PowerG, as you know, is the best in the business, ensuring reliability and cybersecurity.

PowerG is the leading wireless security brand trusted by companies all over the world. In addition to market-leading range, PowerG has the industry's best encryption with frequency hopping to automatically avoid interference. Plus, the signal automatically adjusts its transmit power to conserve battery. Ideal for both residential and commercial use.

SMART CONNECTIVITY EXCEPTIONAL COVERAGE

Smart homes need smart communications. In addition to PowerG, WiFi, LTE, Z-Wave Plus, and Bluetooth are all on-board. And with faster, better range!

This means IQ Panel 4 works seamlessly with home automation devices like smart lights, window shades, thermostats, smoke detectors, and more. All the connectivity and convenience required to manage a smart home.

In addition, dual path LTE + WiFi connectivity reduces latency and increases speed. Moreover, it enhances coverage, adding a layer of reliability and security by providing two different paths for signals to use.

BUNDLED WITH ALARM.COM
